PP RTF-3 THERMOFORMING GRADE

Starting from 2013, S.C. Rompetrol Rafinare S.A, Petrochemicals Division has in product portfolio a new PP grade with superior properties: PP RTF-3 (Rompetrol Thermoforming, MFI=3g/10min);

The grade PP RTF-3 is a customized product which give to the final products superior characteristics from achieved performance point of view:

- Superior optical properties;
- High physic-mechanical properties;
- Good processability performance;

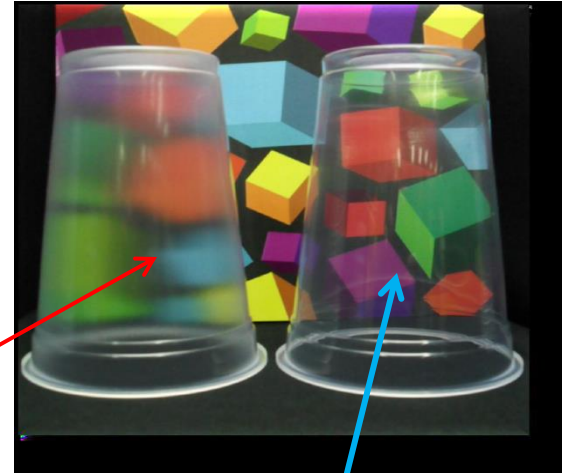

The product is on market from begging of 2014, it was tested with very good results and is in constant production.
